IK Multimedia announces iRig Pro Duo Studio Suite bundles

iRig Pro Duo Studio Bundles give musicians an incredible value with all the hardware, accessories and software they need to play, sing and record with GarageBand and more

November 11, 2016 - IK Multimedia is pleased to announce two new complete bundles - the iRig Pro Duo Studio Suite and iRig Pro Duo Studio Suite Deluxe. **iRig Pro Duo Studio Suite** includes the iRig Pro Duo dual-channel audio/MIDI interface, the new iRig Mic Studio XLR professional compact analog condenser microphone and XLR cable, iRig professional closed-back monitoring headphones, plus AmpliTube 4, SampleTank 3 SE, T-Racks Deluxe, Miroslav Philharmonik 2 CE software and more. **iRig Pro Duo Studio Suite Deluxe** includes everything above, plus the addition of iRig Keys Pro, IK's 37-key MIDI controller for sequencing and playing virtual instruments. The iRig Pro Duo Studio Suite bundles give players a complete solution ideal for making and recording music in GarageBand for iOS and Mac, as well as other compatible digital audio workstation software (DAW's).

Each iRig Pro Duo Studio Suite bundle offers tremendous savings over the price of the individual hardware, software and accessories making it perfect for students, education environments, professional mobile studios, home studios and musicians of all types.

iRig Pro Duo - the heart and soul of the bundle

At the heart of the iRig Pro Duo Studio Suite bundles is the iRig Pro Duo, the dual channel audio/MIDI mobile interface for iOS, Mac & PC. The iRig Pro Duo features dual XLR/1/4" combo jack inputs with individual gain controls and phantom power for connecting studio microphones, guitars, basses and other instruments. It has both a headphone output with level control and dual balanced 1/4" outputs for monitor feeds and features MIDI in/out for connecting standard MIDI controllers and control surfaces. iRig Pro Duo is a truly mobile interface - it can be powered by USB, or by the included AA batteries and is core-MIDI and USB class compliant so giving players "plug-and-play" performance.

iRig Professional Studio Headphones

Hear every detail with all-day comfort - that's the iRig Headphone difference. iRig high-definition headphones feature a closed-back design to prevent audio bleed-through while recording, and provide exceptionally deep low frequency definition. Plus, iRig Professional Studio Headphones give you ultra-accurate midrange and treble response so you hear your music exactly as it is intended. The lightweight, ergonomic design, thick foam ear surrounds and double-comfort headband adjusts to any head size, giving you the most comfortable monitoring experience for long recording sessions.

iRig Mic Studio XLR – the compact pro analog studio mic

iRig Mic Studio XLR - the analog version of the wildly popular iRig Mic Studio digital microphone. iRig Mic Studio XLR is an ultra-compact cardioid studio condenser microphone designed for capturing pro recordings on the go with an iPhone, iPad, Android, Mac or PC and a compatible audio interface like the iRig Pro Duo. iRig Mic Studio XLR features a unidirectional large-diaphragm 1" condenser-electret microphone capsule housed in a rugged compact durable metal enclosure. iRig Mic Studio XLR is small enough to fit in any travel or gig bag and makes the perfect travel recording companion. iRig Mic Studio XLR comes with a portable tripod tabletop stand, mic stand adapter clamp, and a 2-meter XLR cable.

iRig Keys Pro

The iRig Pro Duo Studio Suite Deluxe also comes with iRig Keys Pro, the 37-key MIDI keyboard controller for iPhone, iPad, Mac & PC. iRig Keys Pro is the perfect MIDI controller for musicians on the go - it's core-MIDI compatible and USB class compliant so players have a complete plug-and-play solution anywhere they make and play music. It features 37 full-size velocity sensitive keys, pitch & mod wheels, plus fully assignable backlit softouch buttons and a programmable data/volume knob.

Over \$/€690 of included software, free

iRig Pro Duo Studio Suite bundles also come loaded with software tools musicians need to make their compositions and performances the best they can be. Included are AmpliTube 4, the ultimate guitar and bass tone studio, SampleTank 3 SE sound and groove workstation, T-Racks Deluxe mixing and mastering suite, T-RackS Mic Room microphone modeling suite, Miroslav Philharmonik 2 "Classik Edition" orchestral workstation plus 25 "Custom Shop" gear credits for use on any gear or instrument collections in the Custom Shop.
