**FOR IMMEDIATE RELEASE**

## **7 IK Multimedia Accessories Fully Compatible with the New iPhone 5**

*Owners who switch to Apple's new phone can use their IK hardware straight away*

**September 25 2012** – IK Multimedia, the leader in mobile music creation apps and accessories for iPhone, iPod touch and iPad, is pleased to announce that seven of its audio accessories, including **iRig™**, **iRig MIC**, **iRig MIC Cast**, **iRig MIX**, **iRig STOMP** and **iRig PRE** have been tested and are fully compatible with Apple's new iPhone 5. In addition to these audio accessories, IK announced that its **iKlip MINI** universal mic stand adapter for iPhone is also compatible with the new iPhone 5. This means that IK Multimedia users can continue to rely on their accessories after upgrading to Apple's latest phone.

Because IK's audio accessories connect to the iPhone via the headphone jack, rather than the dock connector, users won't have to purchase adapters to accommodate the iPhone 5's new dock, like those who own accessories from other companies will.

The IK accessories that are now compatible with the new iPhone 5 cover every aspect of music creation and performance, from guitar and bass playing, to singing and recording, to DJing and live performance.

### **Guitar & Bass**

**iRig** was the first, and still is the most popular guitar-and-bass interface adapter for the iPhone. It offers an affordable price and full compatibility with IK's range of effects-processing apps such as AmpliTube®, AmpliTube Fender® and AmpliTube Slash, plus a multitude of other apps including GarageBand.

**iRig STOMP**, just announced, is the first stompbox-style guitar and bass interface. It allows guitarists and bassists to integrate their favorite signal processing apps into their live setup, inline with their other effects.

### **Vocals & Recording**

**iRig MIC** is the premier handheld mic for recording with iOS audio apps like IK VocalLive™, iRig Recorder and many others. Featuring real-time monitoring and a three-level gain switch, it deftly handles everything from singing to speeches to instrument recording.

**iRig MIC Cast** provides users with an ultra compact, low-profile mic designed for recording podcasts, interviews, lectures, and other spoken-word material. It offers flat

frequency response and direct pick-up pattern for recording without background noise.

**iRig PRE**, just shipping, is the first studio-quality, mic preamp for the iOS platform, and makes it possible to use professional mics including dynamics, ribbons and condensers with iOS recording apps. It sports such pro features as an XLR input and switchable 48v phantom power.

**DJ and Mixing**

**iRig MIX** is the first iOS mobile mixer for DJs and live musicians, and includes a full lineup of professional features such as a crossfader, separate channel faders, EQ, cue, a master volume and more. It makes a great hardware front end for IK's DJ Rig app for iPhone, and can also be used in any other application where a small portable mixer is required.

**Stage**

**iKlip MINI**, a universal mic stand adapter for iPhone and iPod touch, makes it easy to securely clip the iOS device to a microphone stand for live performance and practicing. Not only does it work with the iPhone 5, but with every other existing iPhone and iPod touch model.

All IK apps are also working with the iPhone 5, and will be updated soon to take advantage of the larger screen and additional processing power.

**Price and Availability**

The abovementioned accessories are available now from authorized IK Multimedia music and electronics retailers worldwide and from the IK Multimedia Online Store, with prices ranging between \$39.99 and \$99.99 (€29.99 to €74.99 ex. taxes).
