iOS device are accessible

- Fast installation — can be mounted in seconds
- Includes detachable iRig bracket for use with the AmpliTube range of apps or any other iOS guitar effects app
- Perfect companion to the iRig Mic handheld microphone and vocal processing apps such as VocaLive
- Can be used with a variety of apps including karaoke, score and tablature, DJ, recording, mixing, video, photography, teleprompting and many more
- Designed and manufactured in Italy

Modeled after the popular iKlip for iPad, iKlip MINI firmly holds your iPhone and iPod Touch in place in both horizontal and vertical positions. iKlip MINI's multi-angle adjustable design provides optimal viewing and accessibility to all controls, buttons, connection ports and camera free from obstruction. It can also be easily rotated from portrait to landscape position by simply loosening or tightening a knob with no need for tools. It can be mounted on the vertical pole of a mic stand as well as on its horizontal boom.

Whether playing live or practicing, iKlip MINI can be used for many types of musical activities such as effects editing, score viewing, DJ work and karaoke singing. Plus, it can also be used for other practical applications such as taking steady pictures or capturing video.

Users of **iRig**, another popular IK Multimedia mobile accessory device, can support their guitar interface adapter with the iKlip MINI with the included detachable bracket mount. This makes iKlip MINI the perfect accessory for the AmpliTube range of apps or any other guitar effects app.

iKlip MINI is also ideal for another IK Multimedia mobile accessory, **iRig Mic**, the handheld microphone for iOS devices, that allows singers to conveniently operate the device at a close distance on the same mic stand with their device running IK's VocaLive or any other vocal processing app.

Pricing and availability

The iKlip is available at select IK Multimedia music and electronic retailers worldwide or from the IK online store for only \$39.99/€29.99 (excl. tax).
